

ÁKOS T. HADAR

akoshadar@gmail.com | (+44) 7933 717696 | Fleet, Hampshire, GU52 0YT | akoshadar.com | [GitHub](#) | [LinkedIn](#)

I am a highly driven Physics and Mathematics student, planning on becoming a Particle Physics researcher. My previous work and academic experiences have helped me become extremely organized and effective in many different disciplines and roles. I'm comfortable working in large teams and am a quick learner.

EDUCATION

Mathematics and Physics (MPhys) - University of Surrey

18/09/2023 - Present

Expected Graduation: 18/06/2027

—
—
—

First Year Avg: First Class (78.63%)

Second Year Avg: First Class (74.75%)

Third Year Avg: First Class (84.75%)

SKILLS and EXPERIENCE

Experience working in a team

- Produced multiple projects in medium and large teams such as data analysis software and research papers.
- Produced a research paper in the 2025 International Physics Tournament in a team representing the UK (produced theoretical model and planned experiment). See paper [here](#).

Specialist Skills

- Extensive knowledge of mathematics in areas such as Calculus, Algebra, Linear Algebra and Statistics.
- Programming using Python, HTML and CSS (projects can be viewed through my GitHub at the top of this page).
- Producing reports and other documents with either Word or PDFs with LaTeX.
- Comfortable learning how to operate complicated equipment.

EMPLOYMENT HISTORY

Company: MyTutor

05/01/2025 - Present

Job Title: Mathematics and Physics Tutor (GCSE and A-level)

- Preparing student-specific worksheets and lessons.
- Marking students' work.
- Helping students develop programming and maths skills.

Main achievements: I have helped many students rise through grades quickly with one student improving from Grade 4 to Grade 8 in Maths GCSE before final exams.

Company: University of Oxford

14/07/2025 - 05/09/2025

Job Title: Research Assistant

- Researching the physics of climate modeling.
- Researching the use of Reduced-precision, Stochastic Physics and Machine Learning in climate modeling and weather prediction.

Main achievements: I have produced multiple reports on the use of the above mentioned methods and technologies and their impact around the world. These reports are estimated (by Dr Bryony Elbert Straker; see References) to save the University of Oxford between £750k - £1m by the end of 2028.

NOTABLE ACHIEVEMENTS and AWARDS

Department of Physics Laboratory Prize	2025 and 2026
International Physics Tournament UK Team Member	2025
Completed a 15-day cycling trip from London to Budapest	2023
UKMT Senior Mathematical Challenge: Gold Certificate	2022
Gold Duke of Edinburgh Award	2022

ADDITIONAL SKILLS

-
- I. 7 years of experience with Python
 - II. Some experience with HTML and CSS
 - III. Fluent in Hungarian and English
 - IV. Proficiency in LaTeX

Hobbies and Interests

- Sports (tennis, cycling, hiking)
- Reading (science-fiction and other novels)
- Music (composing on piano and guitar)
