Education and Qualifications

University of Surrey

Mathematics and Physics (MPhys)

(18/09/2023 - Present)

First Year Average: 78.63% (First Class)

Second Year Average: 74.75% (First Class)

Relevant Modules

- Nuclear and Particle Physics (Y2)
- Properties of Matter (Y1)
- Quantum Physics (Y2)
- Numerical and Computational Methods (Y2)
- Electromagnetism/Electromagnetic Waves (Y2/Y2)

Relevant Skills and Experience

Laboratory Work (First Class in Y1 and Y2 with 100% in both semesters of Y2)

Completed various experiments in professional laboratory settings including:

- Measuring the Charge/Mass ratio of an electron
- Measuring various natural constants such as Planck's constant and the speed of light
- Using a Fabry-Perot interferometer to identify elements.

Programming

Created multiple complex (individual and group) projects using Python including:

- A-level NEA: personal assistant AI (Grade: A) see [here](#).
- University group project: developing a computational model to predict outcomes of Olympic events (First Class).

Research Experience

Written multiple First Class lab reports as well as a competition research paper in which I was responsible for planning an experiment and creating a novel theoretical model

- University lab reports ([here](#)) and group projects (First Class).
- Group paper for the 2025 International Physics Tournament (produced theoretical model and planned experiment). See paper [here](#).

Employment History

Company: MyTutor

Job Title: Mathematics and Physics Tutor (GCSE and A-level)

(05/01/2025 - present)

- Preparing student-specific worksheets and lessons.

- Marking students' work.
- Helping students develop programming and maths skills.

Company: University of Oxford

(14/07/2025 - 05/09/2025)

Job Title: Research Assistant

- Researching the physics of climate modeling.
- Researching the use of Reduced-precision, Stochastic Physics and Machine Learning in climate modeling and weather prediction.

Notable Achievements and Awards (Academic and Non-Academic)

2025 International Physics Tournament UK Team Member.

Year of Selection: 2024

Completed a 15-day cycling trip from London to Budapest.

Year: 2023

UKMT Senior Mathematical Challenge: Gold Certificate

Year Awarded: 2022

Gold Duke of Edinburgh Award

Year Awarded: 2022

Additional Skills

- 7 years of experience with Python
- Some experience with HTML and CSS
- Fluent in Hungarian and English
